

RECAP AND SUMMARY

Name: Namitha Bhasi

Role: Full Stack Developer Intern

Review Period: May 25, 2026 – June 20, 2026

Date: June 20, 2026

PERSPECTIVE

Had a great time starting from 25/05/2026 the tenure has been a knowledgeable and rewarding journey. Each day was incredibly informative: I had opportunities to take leadership as day leader and task leader, work in a team, keep timelines for tasks, share and analyse details at a micro level, research about new info and lots more.

Meetings always felt like open discussions, where I had the freedom to bring up ideas and raise doubts. This built confidence and encouraged active participation.

The journey began with understanding the company, its work culture, project execution methodology, and future vision. As the internship progressed, I gained hands on experience in requirement analysis, documentation, review processes, and collaborative learning activities.

A key highlight of the time was the gradual progression of responsibilities. We started by analysing reference websites and preparing UI focused Business Requirement Documents (BRDs), then moved on to role-based requirements, business logic understanding, Cross QA activities, sitemap preparation, and API documentation. By the latest phase, we were able to document a complete website solution from initial requirement analysis and design building then planning through to comprehensive API documentation.

Overall, it has been a valuable learning experience that enhanced my skills in handling responsibilities in a professional environment.

GRATITUDE

I am thankful to Manu Mathew for guidance and mentorship. Sessions gave me clarity on different opportunities which will serve as a strong foundation for my future learning and career development. Thank you and thank you to all my team members for the good team time since there is always shuffle in team interacted with all team members.

TASKS AND SUMMARY

Task	Start Date	End Date
Orientation Session & Orientation Report Preparation	25/05/2026	29/05/2026
Visa Americas BRD Preparation & Cross-QA Review	01/06/2026	09/06/2026
Clear2Start BRD Preparation & Review	10/06/2026	12/06/2026
Arcore Exim BRD & Sitemap Preparation	15/06/2026	17/06/2026
Mini E-Commerce Website (Restaurant/Wearable) BRD, Sitemap & API Documentation	18/06/2026	20/06/2026

Task 1: Orientation Session & Orientation Report Preparation

Duration

25/05/2026 – 29/05/2026

Activities Performed

- We created teams' group and all team members divided into 2 teams team a and team b. I belong to team a with Abhinav neelima sooraj.
- Participated in internship onboarding and team formation.
- Attended orientation session conducted by Project Manager and Internship Team Head, Manu Mathew.
- Learned about company structure, departments, work culture, and project execution methodology.
- Understood Agile methodology, Scrum process, and internship workflow.
- Participated in discussions related to AI and current technology trends.

- Prepared Orientation Summary Report.
- Performed report reviews, identified missing points, and finalized the documentation.

Leadership Opportunity

- Day Leader responsibility and coordinated team activities and task progress .

Key Takeaways

- Understanding of company operations and culture.
- Introduction to Agile and Scrum practices.
- Importance of documentation quality and review cycles.
- Awareness of current IT industry trends and AI developments.

Task 2: Visa Americas BRD Preparation & Cross-QA Review

Duration

01/06/2026 – 09/06/2026

Activities Performed

- Analysed the Visa Americas reference website.
- Prepared foundational Business Requirement Document (BRD).
- Identified website modules, pages, and functional requirements.
- Participated in Team A and Team B review activities.
- Conducted cross-QA analysis and documented observations.
- Compared documentation approaches and identified improvement opportunities.
- Participated in requirement clarification discussions.

Leadership Opportunity

- Day Leader responsibility and coordinated team activities and task progress .

Key Takeaways

- Requirement gathering and analysis techniques.
- BRD structure and documentation standards.
- Importance of peer reviews and quality assurance.
- Team coordination and leadership experience.

Task 3: Clear2Start BRD Preparation & Review

Duration

10/06/2026 – 12/06/2026

Leadership Opportunity

- Day Leader and coordinated team activities and task progress in respective days.

Activities Performed

- Performed requirement analysis for Clear2Start.
- Planned task execution and review strategy.
- Prepared BRD documentation within a shorter timeline.
- Coordinated review activities and observation sharing.
- Participated in discussions to finalize requirements.

Key Takeaways

- Managing documentation within tight deadlines.
- Improved planning and execution skills.
- Better understanding of requirement validation processes

Task 4: Arcore Exim BRD & Sitemap Preparation

Duration

15/06/2026 – 17/06/2026

Leadership Opportunity

- Day Leader responsibility and coordinated team activities and task progress.

Activities Performed

- Studied business website requirements.
- Prepared Frontend UI documentation.
- Created Sitemap structure.
- Documented Admin Console requirements.
- Organized requirements into structured documentation.

Key Takeaways

- Understanding business-focused website architecture.
- Sitemap planning and navigation flow design.
- Admin module requirement documentation.

Task 5: Mini E-Commerce Website (Restaurant)

Duration

18/06/2026 – 20/06/2026

Leadership Opportunity

- Task leader for this task took the responsibility and coordinated team activities and task progress.

Activities Performed

- Prepared Business Requirement Document.
- Designed Sitemap structure.
- Documented front end brd.
- Documented Admin Portal brd and backend logics.
- Prepared module-wise API documentation.
- Organized and sorted the final project documentation and shared the document.

Key Takeaways

- Task leader for this task.
- End-to-end project documentation lifecycle.
- API planning and module mapping.
- Understanding customer and admin workflows.
- Experience documenting a complete solution from UI requirements to API specifications.

Task 6: Recap and summary prep

CONCLUSION

This internship has been a meaningful learning journey that provided practical exposure to professional project workflows, documentation standards, team collaboration, and leadership responsibilities. Through various assignments, I gained hands-on experience in requirement analysis, BRD preparation, Cross-QA reviews, sitemap creation, backend logic documentation, and API documentation.

The gradual progression of tasks helped me understand how a project evolves from initial requirement gathering to complete project documentation. The opportunities to work as a Day Leader and Task Leader further strengthened my communication, coordination, planning, and decision-making abilities.

Beyond technical knowledge, this experience highlighted the importance of teamwork, continuous learning, attention to detail, and maintaining quality throughout the project lifecycle. The guidance received, collaborative environment, and practical exposure have significantly contributed to my professional growth and confidence.
